DETAILED ACTION

Claim Objections

Claims 1, 3 and 4 are objected to because of the following informalities:

In claim 1, line 12, the word "generator" should be --generate--.

In claim 3, the phrase "the LPP window generator" should be --a LPP window generator--.

In claim 4, the phrase "the phase lock loop" should be --a phase lock loop--.

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art (Yokoi et al. US 6487149) teaches all the elements of claim 1 except a sample signal generator for receiving the LPP bottom signal and a sample and hold signal to generate a hold level signal. Yokoi et al. also does not teach a digital processor that receives a wobble clock. These elements in combination with all of the other elements of claim 1 make the claim allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inokuchi et al. (US 6912190) teaches the detection of a land pre pit signal.

Yokoi et al. (US 6487149) and Kamioka et al. (US 6744721) teach adjusting the slice level in circuits for reading a land pre pit signal.

This application is in condition for allowance except for the following formal matters:

The objections of claims 3 and 4.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
